## Personal Statement

Trained as a psychologist to work with both children and adults, my therapeutic focus over the last 15 years has shifted to financial therapy and helping my clients heal deeply embedded money beliefs that are destructive and self-defeating. My published book, *Crazy About Money: How Emotions Confuse Our Money Choices and What to Do About It* (February 2011), draws heavily on my own and my client's experiences with their "money devils." My personal and professional goal is to continue my own clinical work and partner with financial advisors.
